

ORGANIC SILK BY WEISBROD

VALUES THAT REALLY SUIT YOU.

Weisbrod presents the world's first collection of organic silk fabric. This new collection has been created in close cooperation with the Swiss company Alkena, a pioneer in the world of knitwear made of sustainably produced silk. The greige meets the EU regulation for organic production 834/2007

Organic silk: the finest silk, based on a fair, respectful and future-oriented relationship with people and the environment.

FABRIC THAT SHINES IN TERMS OF FUNCTION.

Organic silk by Weisbrod is a genuine natural product with smooth qualities. It feels light and sensual on the skin, protecting it from the summer heat and the winter cold. In addition, clothing and bedding made of organic silk inhibit odors while being extremely durable.

COMFORTABLE RESPONSIBILITY.

Organic silk by Weisbrod is produced following kbT standards – strict European guidelines for organic animal husbandry. The silk is harvested using organic-dynamic methods in a mixed cultivation of mulberry and fruit trees. Artificial fertilizer, antibiotics and growth hormones are strictly forbidden.

THE ADDED VALUE OF A GOOD FEELING.

The silk farmers at the beginning of the production chain enjoy good working conditions: job security, a five-day work week, and the means to allow their children to grow up carefree. Every piece of cloth tells its own story. Let's be sure that it's a happy one from the very start.

RESPONSIBILITY FOR MEN AND NATURE

At Weisbrod, ecological and social principles are very important. As we manufacture the fabric by boiling, twisting, weaving and dyeing the organic silk, we use only environmentally friendly chemicals and dyes.

The fabric made of certified greige is labeled as «Bioseide – organic silk».

Manufacturer:

Weisbrod-Zürrer AG, Hausen am Albis, Switzerland

Distribution:

Seidentraum, Dr. Matias Langer, 04316 Leipzig, Germany
